Automated Tracking Solutions for
Public Safety

Through our years of providing fleet management services to public safety, we have learned that when it comes to public safety, every second counts. First responders, such as police and other law enforcement agencies, fire fighters, and medical emergency personnel, need to be fast and efficient to save lives and protect the public. Knowing the location of every emergency vehicle at all times with GPS fleet tracking is critical in emergency response situations.

Monitor Vehicle Activities

- Arrivals and departures
- Deceleration and acceleration
- Location (even on private roads)
- Versatile cadence (update rates)
- Routes
- Speed
- Turns
- 24-hour tracking

Receive real-time alerts and notifications

Prevent Equipment Breakdowns

- Get automated reports on engine performance
- Identify need to preventative maintenance to reduce engine damage and costly breakdowns
- Improve your fleet management capabilities with reports that detail actual mileage and performance

Get Better Data

- Import your own maps to be used as a custom layer
- Get turn-by-turn data on each vehicle
- Get reports on speeding, idle time, driver performance, and more
- Web API directs data integration with large third-party systems such as dispatch service providers or industry-specific tracking platforms

Improve Safety and Reduce Risk

With the Find Closest Vehicle feature, the click of a button can find the closest vehicles and officers to a location where they are needed. This feature will ensure that you have the fastest response time possible in an emergency situation.
