

Automated Tracking Solutions for Municipalities

Maintaining the road infrastructure of communities is typically left up to government agencies and their trusted government vehicles. Government agencies are responsible for everything from clearing and repairing roadways of potholes and debris, to managing seasonal hazards such as snow and ice, to engaging in disaster recovery after a tornado or hurricane.

Get Better Data

- Improve your fleet management capabilities with reports that detail actual mileage and performance
- Import your own maps to be used as a custom map layer
- Get turn-by-turn data on each vehicle
- Access maps with driver location
- Calculate which vehicle is closest to the applicable location

Extremely Flexible Deliverables

- Host the software at your own location or one of our secure and diverse sites, or take advantage of our SaaS solution
- Build your own features on top of our core platform with RESTful API and/or Data Push Service
- Large variety of payment and contract terms

Monitor Activities

- Arrivals and Departures
- Deceleration and acceleration
- Location (even on private roads)
- Versatile update rates
- Routes
- Speed
- Turns
- 24-hour tracking

Get real-time alerts and notifications on these activities

Monitor Road and Street Activities with StreetComplete

- Monitor important tasks utilizing real-time, color-coded maps
- Perfect for street sweeping, refuse pickup, snowplowing, patrols, and general maintenance
- Map coloring can be changed as task milestones complete
