

Automated Tracking Solutions for Heavy Equipment Rental

For companies that own or rent heavy equipment for construction, protecting and extending the useful life of these assets through heavy equipment maintenance are among your top priorities. Between the high cost of heavy equipment rentals or purchases, the difficulty of replacing damaged or stolen heavy equipment, and the lost income your organization faces when it is unavailable, protecting these assets is essential. This is where heavy equipment tracking can help.

Monitor Jobsite Performance Remotely

- Reduce engine idle time to save fuel
- Estimate costs more accurately by reviewing usage
- Track equipment on Google Maps or integrate your own
- Monitor engine hours to schedule fuel trucks or invoice rental jobs more accurately

Safeguard Equipment

- Get automated tracking that locates equipment
- Receive alerts when equipment moves or trailer doors open
- Locate stolen equipment
- Have the ability to remotely disable starter when engine is not in use

Get Better Data

- Understand which equipment is idle and why
- Improve your project management with reports that detail actual usage on the job
- Enhance your estimating capabilities by reviewing summary reports
- Identify need for preventative maintenance

Go With a Proven Leader

- Get ongoing access to upgrades that contain new features and updates to ensure compatibility with the newest computer hardware and communication systems
- Get support from an established innovator in tracking systems, backed by over 30 years and the tracking of over \$2.5 billion in vehicles and assets
