Automated Tracking Solutions for Education Fleets

There is possibly no more important industry that requires safety measures and timely pickups/drop-offs than school transportation. The technology available today is increasing the safety, reliability, and efficiency of school bus transport systems across the nation.

Manage and Watch Driver Activities

- Arrival and departure times
- Deceleration and acceleration
- Location (even on private roads)
- Stop arm and hazard light monitoring
- Routes
- Speed
- Turns
- 24-hour tracking

Monitor standard routes as well as field trips and after-school activities

Prevent Equipment Breakdowns

- Get automated reports on engine performance
- Identify need to preventative maintenance to reduce engine damage and costly breakdowns
- Monitor bus and food service vehicle engine conditions to meet benchmark performance standards

Get Better Data

- Receive reports that detail actual mileage and vehicle performance
- Get turn-by-turn data on each vehicle on any time period you wish
- Set geofencing boundaries
- Get better fuel usage data
- Calculate which vehicle is closest to an applicable location

Go With a Proven Leader

- Get ongoing access to upgrades that contain new features and updates to ensure compatibility with the newest computer hardware and communication systems
- Get support from an established innovator in tracking systems, backed by over 30 years and the tracking of over $2.5 billion in vehicles and assets
