RASTRACFUSION

The combination of Rastrac's best in class software and embedded vehicle telematics

Keep your fleet running smoothly with OEM Embedded Data, providing instant, real-time access to manufacturer validated vehicle information without costly hardware or complex setups. By tapping directly into your vehicles' embedded systems, you gain richer insights for smarter decisions, from maintenance planning to operational efficiency.

⚠️ Instant fleet visibility across OEM connected vehicles no devices, no installs

📈 Richer, OEM grade data that enables smarter, faster fleet decisions

⚙️ Scalable coverage across mixed OEM fleets, including vehicles previously unreachable

⚙️ Lower operational friction by eliminating hardware, installation, and recurring costs

With OEM Embedded Data, every vehicle in your fleet is visible, protected, and performing at its best. Spend less time worrying about downtime, maintenance, and compliance and more time keeping your operations moving.

Advanced Features That Help You Plan Ahead And Optimize Your Business Operations

Real-Time Vehicle Tracking

See exactly where every vehicle is, track speed, and access odometer readings instantly. With latitude/longitude location data, fleets stay coordinated and responsive.

Advanced Vehicle Maintenance

Monitor engine health, exhaust systems, tire conditions, and service warnings in real time. Detect issues early with OEM Diagnostic Trouble Codes and vehicle health data to reduce downtime and repair costs.

Operations and Compliance

Simplify fleet oversight with odometer tracking, Remote command capabilities, MIL monitoring, Engine Hour data, Emissions monitoring, safety systems, recalls, and warranty events. Keep operations efficient while reducing risk and staying fully compliant.

Safety

Protect drivers and vehicles with insights from ADAS, collision detection, BCM data (doors, windows), seatbelt usage, and harsh driving events. Reduce risk, improve safety, and lower liability.

No Hardware, No Hassle, No Extra Costs

Get the data you need directly from your vehicles- no devices to install, no vehicles taken out of service, and no ongoing hardware or replacement costs. Simplify fleet management while lowering total cost of ownership.

Energy Management

Monitor fuel usage or track battery health, state of charge, and charging behavior for electrification strategies. Improve energy efficiency, reduce costs, and support sustainable fleet operations.
